Containment Targets Zenworks, Tivoli, Track-it		Emerging Platforms Market Watch	
Implications and Dependencies Any small agency with 1K or less clients would not benefit from an asset management tool (too costly), Gartner suggests using a database or (spreadsheet). Track-IT does not have API's for integration with other systems, as all functionality is self-contained. Implications – to obtain a hardware/software inventory from an agency using Track-IT would require programming.			
Roadmap Notes Standard to be reviewed annually after adoption by AOC.
